

Gradebook

The **Gradebook** will display your marks for the course assignments, as well as show you your attendance record.

To view your grades, click **Gradebook** in the **Administration** block on the left navigation pane in your course.

For some assignments (e.g. essays), you will have to wait for your instructor to mark them and enter the grades in the gradebook.

For other assignments (e.g. quizzes), your score will either appear immediately after you have completed and submitted the quiz, or on a release date set by the instructor.

See the document titled "Printing your Grades" for additional information on that topic.
