

Logging Out of Moodle

When you are logged into Moodle, a statement will appear in the **upper right corner** of all course pages. The statement will look something like the image below.

This will always show IF someone is logged in and WHO is logged in.

It is very important that you log out of Moodle when you are finished working (especially on public computers). To log out, go to the same location (upper right corner of any Moodle course window) and click the **down pointing arrow**. Select **Log Out** from the drop down list. See the below image.
